Cabinet-Based 24-Hour Flashing Beacon Data Sheet

carmanah®

24-hour flashing beacons for warning and stop signs increase compliance and reduce blow-throughs:

- ✔ Highest intensity output in the industry
- ✔ MUTCD 11th edition and Buy America/BABA compliant
- ✔ Solar or AC-powered
- ✔ Solar Power Report™ (SPR) prepared for every location to ensure battery longevity

Superior Design and Technology

The R247-G is a cabinet-based system with a separate, high-power solar panel. This design enables the R247-G to work with remote monitoring and operate at higher intensities in challenging environments. MUTCD flash patterns, available ITE intensity, and multiple configurations enable the R247-G to handle all warning and stop sign applications.

Easy Installation

All components, including the battery or AC power supply and Energy Management System (EMS) are housed in a compact, lockable, purpose-built enclosure. It also incorporates a wire routing and termination system, and all components are wired at the factory for an efficient installation.

Advanced User Interface

The R247-G comes with an on-board user interface for quick configuration and status monitoring. It allows for simple in-the-field adjustment of flash pattern, duration, intensity, ambient auto adjust, night dimming, and many more. Optional manual override switch for local control.

Reliable

Every solar-powered model is solar-sized by location to ensure year-after-year operation. Carmanah includes a Solar Power Report to prove sustainability over a 12-month period.
